GREEN NORSE TILGNERKA

And the successful
accommodation of
other projects in our
school

Our reasoning for joining this project

- To adapt to the changes in our world's environment
- To highlight the importance of environment-friendly and ecological education
- School was previously successful with a project 'Blue Tilgnerka' (Modrá Tilgnerka)
- Spread awareness about climate change and combat it effectively
- Buy learning materials to point out the importance of educating about the climate change
- Discuss micro-climate, environment and plant management and rainwater storage and usage

"Working together for a green, competitive and inclusive Europe"

Blue Tilgnerka

"Blue Tilgnerka" is a previous project done by our school, which was financed by a grant from Iceland, Lichtenstein and Norway respectively.

The project was in motion from September 2014 and lasted a whole year, until September 2015

The goal of the project was to develop and promote a curricula focused on rainwater management and its connection to climate change for primary schools

Overall, the project was a huge success and resulted in many positive changes to the school and its environment

The original goals of Blue Tilgnerka

- 1. Develop and promote a curricula focused on rainwater management and its connection to climate change for primary schools
- 2. Propagation of the project
- 3. Organizing workshops, lectures and presentations to raise awareness of the project among the public
- 4. Implementation of technical options (e.g. construction of a vegetation roof, construction of a rain lake and more...)

[GOALS - OUR WEBPAGE](#)

Implementation I - Vegetation roof

- Successful construction of a vegetation roof divided into two kinds of vegetation:
 - Extensive
 - Intensive
- Types of vegetation roof:
 - One-layered
 - Two-layered

[VEGETATION ROOF - OUR
WEBPAGE](#)

Implementation II – Rainfall lake

- Gathering excess water from nearby parking lots, roofs and other terrains
- Main benefits:
 - Decrease of runoff
 - Filtration of foreign substances
 - Helping the micro-climate
 - Create an aesthetically-pleasing environment

[RAINFALL LAKE - OUR WEBPAGE](#)

Implementation III
- Semi vegetative
segmenting
blocks

Implementation IV - Saplings

A success!

One of our teachers, who is an environmentalist wrote articles about our project

Our project was shared and published on other sites as well, spreading awareness as was our goal

It made its appearance on countless other media as well as the "Blue schools" festival

ZELENÁ NÓRSKA TILGNERKA

NÓRSKE FONDY

"Spoločným úsilím k zelenej, konkurencieschopnej a inkluzívnej Európe"

- separačné kontajnery recyklovanie
- záchyt dažďovej vody a meranie kvality vody
- výučba o ekologických témach
- zredukovanie odpadu
- zvýšenie pomeru zelene, sadenie a revitalizovanie stromov
- odstránenie asfaltu

MINISTERSTVO ŽIVOTNÉHO PROSTREDIA SLOVENSKEJ REPUBLIKY

Promoting Recycling

Vymaľuj spodný obrázok
podľa vrchného vzoru.

Názov projektu: **Zelená nórska Tilgnerka**
Projekt sa realizuje v rámci programu „Zmierňovanie a prispôsobovanie sa zmene klímy“ (SK-Klíma)
spolufinancovaného z Nórskeho finančného mechanizmu 2014 – 2021 a štátneho rozpočtu Slovenskej republiky

Vyfarbi kontajnery podľa toho, aký odpad do neho môžeme vytriediť.
Potom vyfarbi odpad a priradi ho k správnejmu kontajneru.

Increase the amount of greenery

Rainwater storage

Reduction of asphalt roads

Undoubtful success

- With the generous help from Norway grants, we will surely:
 - Create a better and more prosperous environment for our students
 - Educate our students about environmental issues
 - Spread awareness further into the community
- Since the previous project was a huge success, we have no doubts that this one will follow in its footsteps
- We are always happy to collaborate with other countries and make our environment a better place for future generations

Thank you for your attention!
